Category	Tools & Skills
Visualization	Power BI, Google Sheets, Excel
Database	MySQL, SQL Queries, Joins, Aggregations
Data Preparation	Power Query, Data Cleaning, Data Transformation
Analytics	DAX, KPI Development, Dashboard Design, Data Visualization
Business Intelligence	Reporting, Performance Analysis, Executive Dashboards

Sales Performance & Business Insights Dashboard

Business Problem: Monitor revenue, profitability, customer behavior, and regional sales performance.

Tools Used: Power BI | Google Sheets | MySQL | Power Query | DAX

Key KPIs: Total Sales, Total Profit, Profit Margin %, Total Orders, Customer Count

Key Insights: Identified top-performing products, customer trends, and regional growth opportunities.

Enterprise Finance Analytics Dashboard

Business Problem: Track revenue, expenses, profitability, and budget performance across the organization.

Tools Used: Power BI | Google Sheets | MySQL | Power Query | DAX

Key KPIs: Total Revenue, Total Expenses, Net Profit, Profit Margin %, Budget Variance

Key Insights: Analyzed financial trends, expense distribution, and departmental profitability.

Supply Chain Analytics Dashboard

Business Problem: Monitor inventory, suppliers, logistics, and order fulfillment efficiency.

Tools Used: Power BI | Google Sheets | MySQL | Power Query | DAX

Key KPIs: Total Orders, Total Revenue, Inventory Turnover, Delivery Time, On-Time Delivery %

Key Insights: Improved visibility into supplier performance and logistics bottlenecks.

Hospital HMIS Analytics Dashboard

Business Problem: Track patient admissions, revenue, bed occupancy, and department performance.

Tools Used: Power BI | MySQL | Power Query | DAX

Key KPIs: Total Patients, Total Admissions, Total Revenue, Bed Occupancy Rate

Key Insights: Enabled data-driven healthcare management through centralized KPI reporting.

Project Controls & Performance Analytics Dashboard

Business Problem: Monitor project progress, schedule performance, cost variance, and resource utilization.

Tools Used: Power BI | Google Sheets | MySQL | Power Query | DAX

Key KPIs: Project Progress %, Schedule Variance, Cost Variance, Budget Utilization %

Key Insights: Identified schedule deviations and improved project visibility.

EPC Project Controls & Executive Analytics Dashboard

Business Problem: Provide executive visibility into EPC project performance, procurement, and construction progress.

Tools Used: Power BI | Google Sheets | MySQL | Power Query | DAX

Key KPIs: Overall Progress %, Procurement Completion %, Construction Progress %, Project Health

Key Insights: Supported executive decision-making through consolidated project controls reporting.

Total Projects	Total Budget	Total Cost Spent	Budget Variance %	Avg Planned Progress %	Avg Actual Progress %	Total Manpower	Delayed Projects	Total Open Issues	Change Orders
30000	₹3821.91 B	₹3821.70 B	-0.01%	67.60%	64.91%	₹76.79 M	14,059	₹751.05 K	₹224.72 K

Thank You
